8. Open the Lightroom mobile app. You'll want to *upload the blank .DNG* file that you just saved to your camera roll into the Lightroom library.
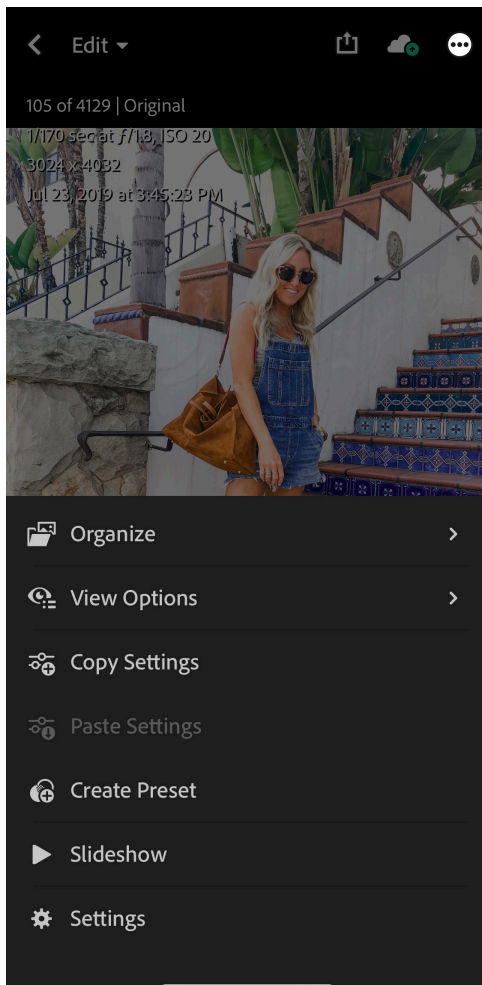

9. Tap on the *blank .DNG file* (don't be alarmed, it will look blank).
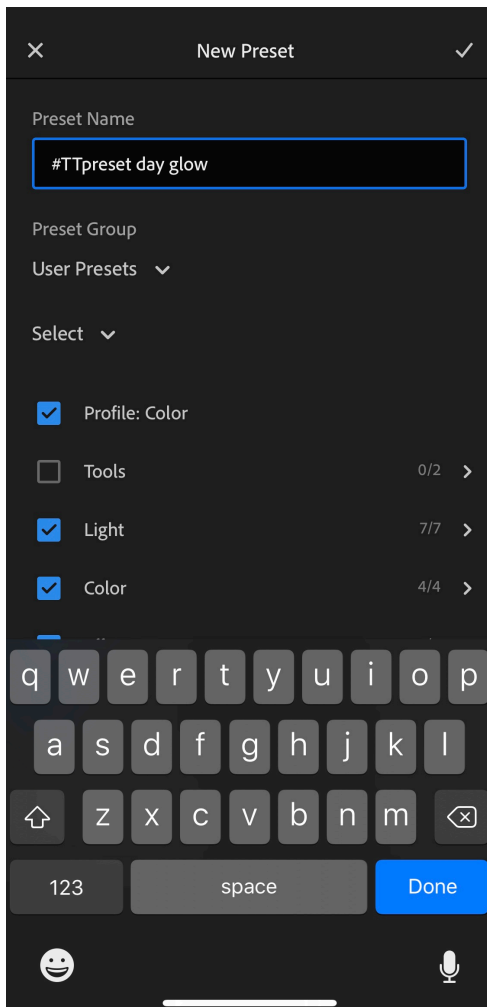

10. A picture of Torey will pop up, then just tap the *check mark* ✔ in the upper right hand corner to add this photo of me to your Lightroom library.

11. Then go find this exact same picture of me in your Lightroom library (you may need to scroll through your camera roll a bit, since it is a date stamped), so you can create and save #TTpreset and apply it to YOUR photos ☺

12. Once the image reappears, click the *3 dots* in the upper right hand corner.

13.　　Now you want save the preset that is connected with this photo by clicking *"create preset"*

14. Simply type out the preset name **#TTpreset day glow** to save it under your presets. Click the ✔ in the right hand corner again.

15. It's official, your photos will look like mine! All you have to do when you want to apply the #TTpreset day glow, is upload your photo in lightroom, scroll over on the bottom toolbar to "presets". When the presets pop up, you'll see the option to click the arrow next to "color". Scroll to the bottom and click "user presets" and apply #TTpresets Day Glow with one-click! *Voila!*

PHOTO EDITING TIPS:

Please note: lighting can vary from all photo locations, photo angles, etc, so you may need to adjust the brightness and the color of your skin tone so it's not as orange. How to do this:

- If you feel that your skin tone appears too orange, decrease the orange saturation
- If you want to dim the photo so it's not so bright and washing you out, simply decrease the exposure and/or highlights.

If you have ANY questions whatsoever, please feel free to email: torey@toreystreasures.com ☺

Don't forget to tag me @toreystreasures on Instagram and use the hashtag #TTpreset so I can see all your beautiful photos!
